

DOE Lessons Learned Template

Title: Walk-down of job site prior to initiation of work.

Date: 07/06/05

Identifier: 2005-RF-16

Lessons Learned Statement: Involve the workers and supervisor in the initial walk-down of job site.

Discussion of Activities: Initially only the work planners and engineers were sent to the initial walk-down of the site. The Facility Manager recognized the advantage of sending the workers and their supervisor to perform the walk-down of the job site. Using this approach, the need for changes was identified prior to the start of the work, resulting in fewer changes during performance of the work.
